516.826.4949

Dr. Leslie G. Batnick D.D.S.  
Dr. Lois B. Levine D.D.S.  
Dr. Joo H. Kim D.D.S

## POST-OPERATIVE CARE INSTRUCTIONS IMPLANT SURGERY STAGE II

### BLEEDING

- **Do not spit, sip through a straw, or rinse mouth** during the first day.
- If bleeding persists, apply one or two moistened tea bags over the area and press firmly for fifteen minutes. Repeat once if necessary, and if bleeding persists, please call.
- Blood-tinged saliva is not unusual and may persist for several hours or even overnight.

### ORAL HYGIENE

- **After the first 24 hours**, rinse mouth with gentle lukewarm salt water.
- A **Chlorhexidine rinse** may be prescribed to cleanse the surgical site.
- Brush your remaining teeth, gums and tongue with a new toothbrush, as thoroughly as possible, taking precaution to avoid disturbing the site.

### SWELLING

- Swelling and bruising will be greatest during the first **24-72** hours following surgery.
- To minimize swelling, place an **ice bag** on the affected side of your face, alternating fifteen minutes on the face, and fifteen minutes off the face. Ice the area for the rest of the day.
- If possible, at night **elevate your head** by using extra pillows.

### DIET & EXERCISE

- **Only consume soft foods during the first day or two following surgery**, in order to avoid contaminating the wound with food particles. Jello, ice cream, yogurt, applesauce, etc. are recommended instead.
- **Avoid very hot or spicy food** for the first two days following the procedure.
- Avoid eating on the side of your mouth that was operated on.
- Smoking is discouraged for the first two weeks following surgery.
- **Do not exercise** for **two** days following surgery

### ANALGESICS

- If you have any discomfort, take 2 Tylenol, Advil, etc., at four hour intervals. If we have given a prescription for you, take as directed.

**\*If you have any questions or problems, please feel free to contact the office at any time\***
